FROM THE EXECUTIVE DIRECTOR-KATE HOEPKE

Dear Members:

September always feels like a new beginning – maybe its from all those years of living by the school calendar. New classes, new friends, new opportunities for enrichment. Our program this month is ripe with possibilities for you to discover innovative ways to engage with ideas, fellow travelers and even yourself.

Last month we told you about a new program, in partnership with the Alzheimer’s Association, called the Dementia Safety Net. Rachel Lanzerotti will be working with members who are experiencing some degree of memory loss and live alone. Our intention is to help you remain safe and independent, so please give Rachel a call to start with a simple conversation.

On September 17th we’ve scheduled a presentation from Dr. Charles Vella, a retired Neuropsychologist from Kaiser Permanente, who will talk about the brain, memory and how we learn. One of the most exciting discoveries of the last decade regards neuroplasticity: our brain’s ability to reorganize pathways, create new connections and, in some cases, even create new neurons throughout our entire lifetime.

Along the lines of learning something new, we invite you to meet Dr. Richard Caro on September 23rd, who will introduce you to a program he calls Longevity Explorers. Firstly, he’ll describe some recently developed, technology-enabled products that are improving the lives of older adults. Next, he’ll invite you to participate in a regularly scheduled group that will discuss how you can contribute to the emergence of novel solutions to some of the challenges of aging. It’s groundbreaking and he would like you to be a part of it!

Some of us learn best when we tell a story or connect our own experience to a larger story. This month we offer you two opportunities to discover the magic of myth and story. On September 29th Olive Shaughnessy, a master storyteller, will regale us with folk tales, fairy tales and myths from the oral...
tradition. She has been entrancing audiences since 1986. On September 1st we begin a 6-part series exploring the PBS documentary *Power of Myth: a conversation between Joseph Campbell and Bill Moyers*. This is a continuation of the Exploring Elderhood group and all members are welcome!

Please join us for an engaging conversation about the bestselling book, *Being Mortal* by Atul Gawande, on September 10th. We will view the Frontline documentary based on the book, which explores what matters most to patients and families experiencing serious illness. After the film, Dr. Patrick Arbore will facilitate an audience discussion of insights and reflections, as well as the issues related to Advance Care Planning.

Finally, we are starting our third year of the Mentoring Exchange Program with 9th grade students from City Arts & Technology High School on September 23rd. This richly rewarding program has helped forge new understanding across the generations and reminded many of us that what we think are differences separating us, are simply questions we haven’t asked yet.

With so much happening this month, I hope I see you soon!

Kind Regards,
Kate

**HOW WE LEARN: Memory & The Brain**

A presentation by Dr. Charles Vella

**Thursday September 17, 10:30 AM - 12 NOON**

IOA Sequoia Room

3575 Geary Blvd, San Francisco, CA

RSVP to info@sfvillage.org or (415) 387-1375

Dr. Vella will review what we know about memory and the brain. Specific topics that will be covered include the history of memorization, the neuroanatomy of memory, erroneous ideas about memory, and neurological conditions that affect memory. Dr. Vella will also challenge our assumptions about learning and offer some tips for improving memory.

**Charles J. Vella, Ph.D.,** started his career as a psychologist doing psychotherapy and psychological testing, then became Chief Psychologist and a Behavioral Manager in the Kaiser Permanente Hospital, San Francisco, Psychiatry Dept., from 1978 to 2009. He founded the Neuropsychology Service there and trained postdoctoral psychology students. Since retirement in 2009, he has continued to attend the Thursday morning Neuropsychology Conference as a volunteer consultant and gives lectures to the staff and students. He does public lectures on neuropsychological topics, including Brain Fitness, Memory, Visual Illusions, and Depression in the Elderly.
ARE YOU CONCERNED ABOUT MEMORY LOSS?

In partnership with the Alzheimer's Association, SF Village is offering a new, free program to assist persons with memory loss who live alone. If you have memory problems, or think you do, including MCI or early Alzheimer's, dementia, or other cognitive impairments, we would like to work with you to help you remain independent in your home for as long as possible. The program includes:

~ Home visits to determine needs (and wants)
~ Help in coordinating support
~ Connection to support agencies and their services
~ Information and tools for families, friends, care circles, and others who provide support

TIME IS RUNNING OUT!

San Francisco Village is part of a national effort to gather evidence about how Village membership helps older adults live well in their own homes. Each summer we will conduct a survey to learn more about your experiences, the impact the Village is having on your life, and how we can improve our program and services to meet your needs. Your participation in the survey is vitally important to us! The higher the response rate, the more accurate our findings will be.

The survey, which must be completed by September 30th, may be conducted by phone, online, in person or on paper. It should take no more than 30 minutes to complete. Members who have joined since May 2015 will not be asked to complete the survey.

ALL INFORMATION YOU PROVIDE IS CONFIDENTIAL! Your name will not appear on your survey. Your questionnaire will only be identified by a number, and the information you provide will be shared anonymously with researchers from the Center for the Advanced Study of Aging Services at UC Berkeley, who are evaluating the Village model nationally. San Francisco Village staff will use your responses to help us improve our program.

Please contact Key Shade at your earliest convenience key@sfvillage.org or (415) 387-1375 to let him know how you’d like to complete the survey and your availability in the next two months.

Thank you for helping us improve our program and advance the Village Movement!

LONGEVITY EXPLORERS: How Can Technology Improve Your Life?

Wednesday, September 23rd 1:30PM - 3:30PM

Whether it’s hearing, vision, mobility, or mental sharpness, a gradual decline in ability to function at our peak comes to us all. But what if technology could be developed that would put off the day when such decline starts to impact daily life? And what if there are things we can do now to make growing older less challenging, but we just haven’t heard about them yet?

In this interactive forum, Dr. Richard Caro will describe some recently developed, technology-enabled products that are improving the lives of older adults. In addition, he will introduce an experimental sharing and ideation community called the Longevity Explorers. This community leverages the insights, years of accumulated wisdom, and the enthusiasm of older adults themselves to accelerate the emergence of novel solutions to some of the challenges of aging. **San Francisco Village and Tech-enhanced Life will start the first Village-based chapter of the Longevity Explorers on October 6th. Learn how you can be part of this group!**

About Dr. Richard Caro
Dr. Caro’s work focuses on the intersection of healthcare, aging and technology. He is co-founder of Tech-enhanced Life; has broad experience in high tech companies in Boston and Silicon Valley; and is a former member of the research staff at Stanford University.
