Dear Members and Friends:

Later this month we’re offering a program called *Agents of Our Own Change - Exploring Personal Narratives*, which is born out of a conversation a few of us started last spring. Since then, I have been contemplating my own personal narrative: the stories I tell myself and others about my history, my aspirations, and my worldview, shaping who I think I am. I’m discovering that these stories are often too small for the life I currently live. Based on ancient history and relationships that no longer nourish me, these internalized scripts have real power to cause dissonance until I bring them out into the light of day.

They’re often stories originating in my childhood with my parents and siblings playing supporting roles. Although I left my family home more than 45 years ago, I recognize how my story archives shape my current relationships and create patterns that repeat. Not until I examine them do they reveal themselves as constraining and outdated. With curiosity and compassion, I’m discovering that I have the power to change them.

I’m inspired by the questions being asked by the Change Agents group. What were the major turning points, or big events, that changed your life irrevocably? How do we each think about ourselves today? Who are we at this time in our lives?

Sometimes major turning points are not big events at all, but rather an insight that has been gestating for decades; a relatively small moment that gives way to an enormous truth. Suddenly the puzzle pieces all snap into place and a new story emerges – one with present day characters and a context that reflects reality, not history or illusion. A new sense of agency breaks through! I see that I’m in charge and I can choose to write a new story that reflects my life today: my values, the relationships I want to invest in, and the beauty I want to create.

This is the gift of San Francisco Village – it offers us unique opportunities to explore new relationships with others, and the one we have with ourselves. With this trusted band of fellow travelers we’re creating a community
grounded in the ethics of care. Join us for any one of 35 programs this month that will energize and uplift you. And then give thanks.

Hope to see you soon!

Kate

Join us for a lively and informative discussion about the effects of climate change. These will include the obvious, like natural disasters and their costs, but also the less obvious, like the impact on refugee and immigration crises around the globe and the impact on health issues.

Carol Vollen was trained at Al Gore’s Climate Reality Project (CRP) last October in Pittsburgh. She is also an active member of Elders for Climate Action (ECA), an organization whose members are concerned about the planet they are leaving to future generations. It is ECA’s goal to engage elders in sufficient numbers to make Congress and other elected officials take note. Elders vote in larger numbers than most other demographic groups. If we can make our voices heard, we will not be ignored. Find out what you can do.

What a nice way to spend the summer—watching films—especially those with a message. The film series has journeyed the changing landscape of LGBT films: beginning with the classic film Boys in the Band (1970) and concluding with Call Me by Your Name (2017). We will continue to talk about how the films move from self-loathing to self-acceptance over a span of fifty years. This film series was curated by SFV member and Film Group host Ralph Beren.

Art With Elders (6-session series over the course of 12 weeks)

10:30 AM – 12:30 PM
SFV, 3220 Fulton St. at 8th Ave.
RSVP to (415) 387-1375 or info@sfvillage.org

This series started in July.

Art With Elders (AWE) uses the power of art, creativity, and community to enrich the journey of aging. In this six-session series, we will venture into watercolors, acrylics, pencils, pastels, collage and possibly 3D art.

AWE provides 2,000 art classes each year for more than 400 seniors throughout the San Francisco Bay Area. AWE is distinctive in its program quality; these are not craft activities, but instead the focus is on skill-building — ranging from color and composition to perspective and background. Each year,
artists submit their work for an annual, juried exhibit. After an opening reception for artists, family, friends, and caregivers, the exhibit then travels to several locations in the Bay Area, where it is viewed by an estimated 30,000 people.

The series will be taught by the esteemed artist instructor Yvette Brown. Her own artwork is about the deep psychological and physical responses people have to motion. She finds doing art brings light to the recesses of the brain that rarely get tapped into. Once you start, there is this zone similar to meditation that is reached. While she doesn’t have the science behind this, she does have the experience!

Most importantly, however, is the sense of community that comes with sharing your home with someone else.

This panel discussion will feature the unique perspectives of both homeowners and housemates who are living the experience. In addition, meet staff and a home seeker from the Home Match SF program. How do we each think about ourselves today? Who are we at this time in our lives? We will explore these questions in this six session series - using TED talks, videos, stories, poetry, books, articles, discussions, writing, and personal sharing.

This series has been planned by and will be facilitated by SFV members. The six sessions are progressive, so each one builds on those that came before. For this reason, it is best if you can plan to attend all six sessions.

Josh Kornbluth has spent over a quarter century as a theatrical monologist, performing autobiographical tales for diverse audiences around the United States, Poland and India. Now he is applying his passion and skill for storytelling to the subject of dementia with three new projects—a theatrical monologue, a feature film and a series of videos—about the connections between brain science and social justice. He is completing a residency as an Atlantic Fellow for Equity in Brain Health at the Global Brain Health Institute, a collaboration between the Memory and Aging Center at UCSF and Trinity College, Dublin, Ireland.

Josh develops his monologues via improvisations in front of audiences, which he then crafts into a
full-length, touring, one-man play. These shows are fundamentally comedic, but they often deal with very serious subjects. Josh plans to deliver a series of improvs on the subject of dementia that he will shape into a finished show designed to be performed on stages around the United States and elsewhere. He intends for this piece to educate audiences about the exciting research being done on brain disease and to help remove the stigma that society often attaches to people with dementia and their caregivers.
